

## How to Import project from GitHub

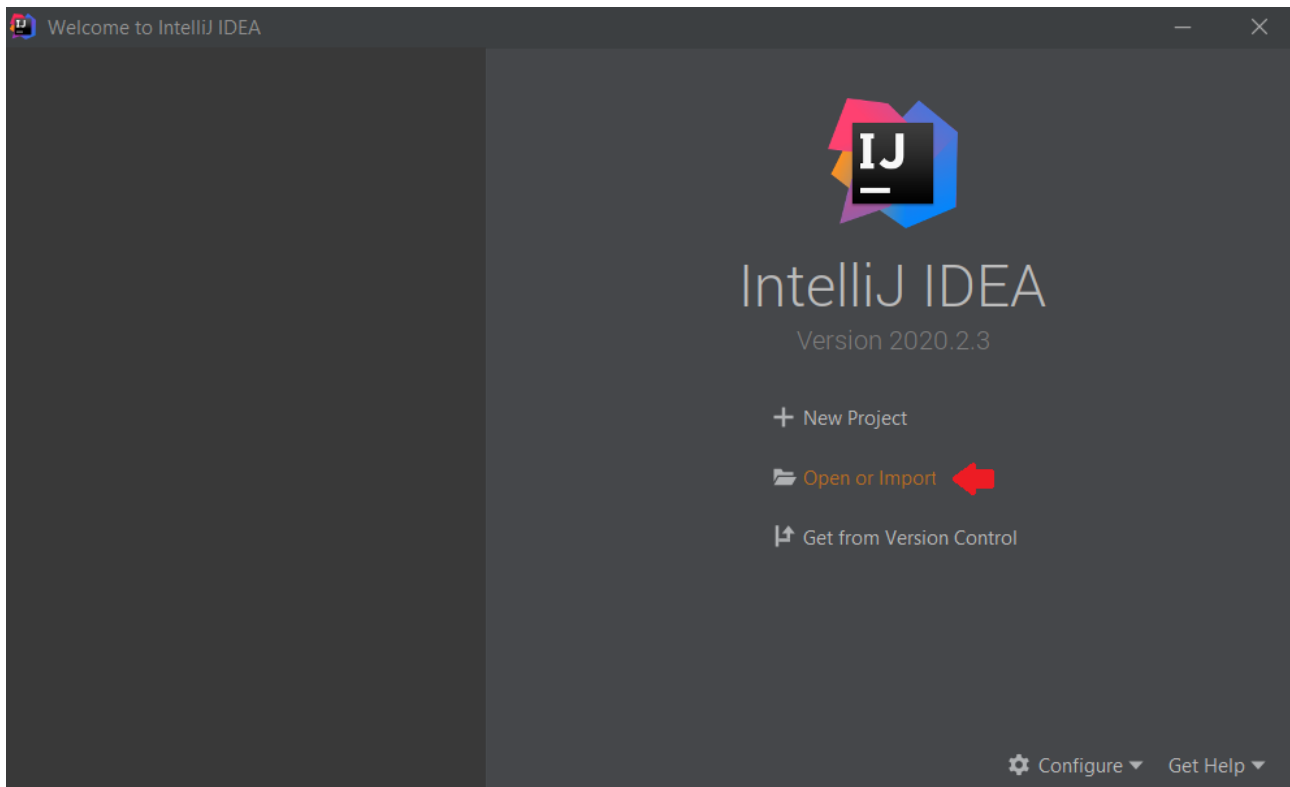

1. Open project repository in GitHub
2. Open "Code" dropdown menu and click "Download ZIP"

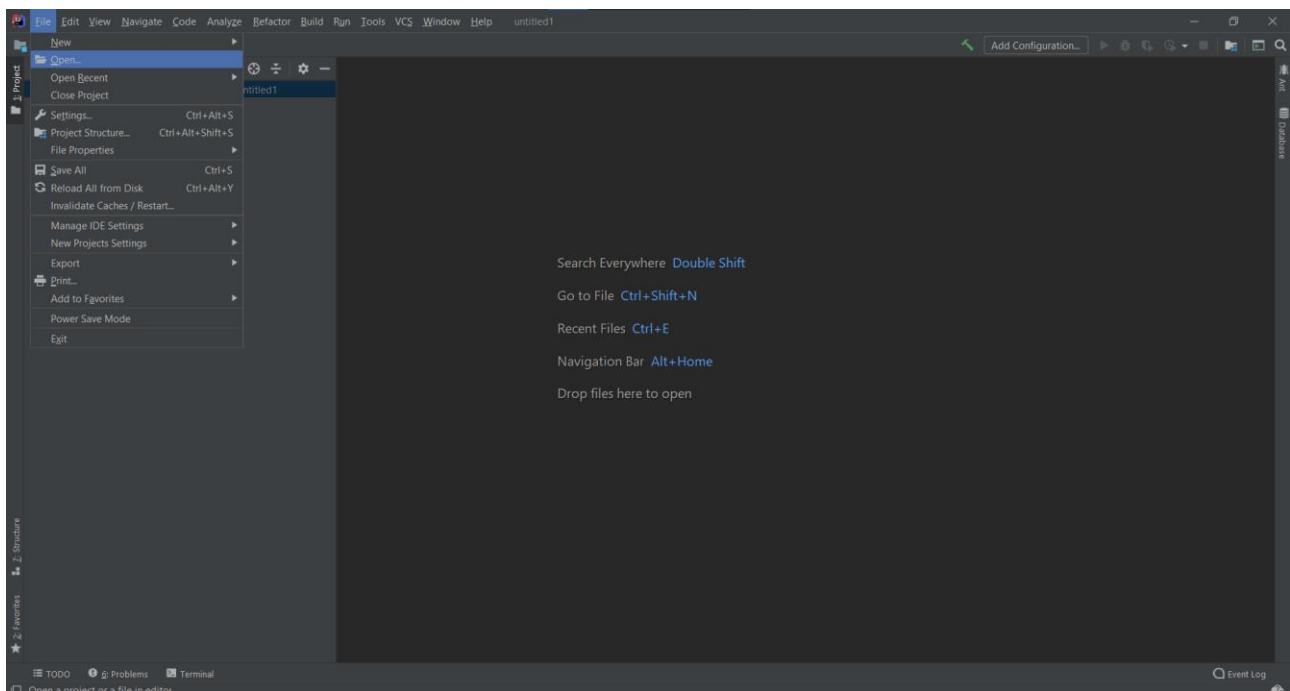

3. Unzip/extract downloaded .zip file to an arbitrary folder
4. Copy the path from unzipped/extracted folder  
Example: `C:\Users\Simon\Dokumenter\Forprojects\24_del2-master`

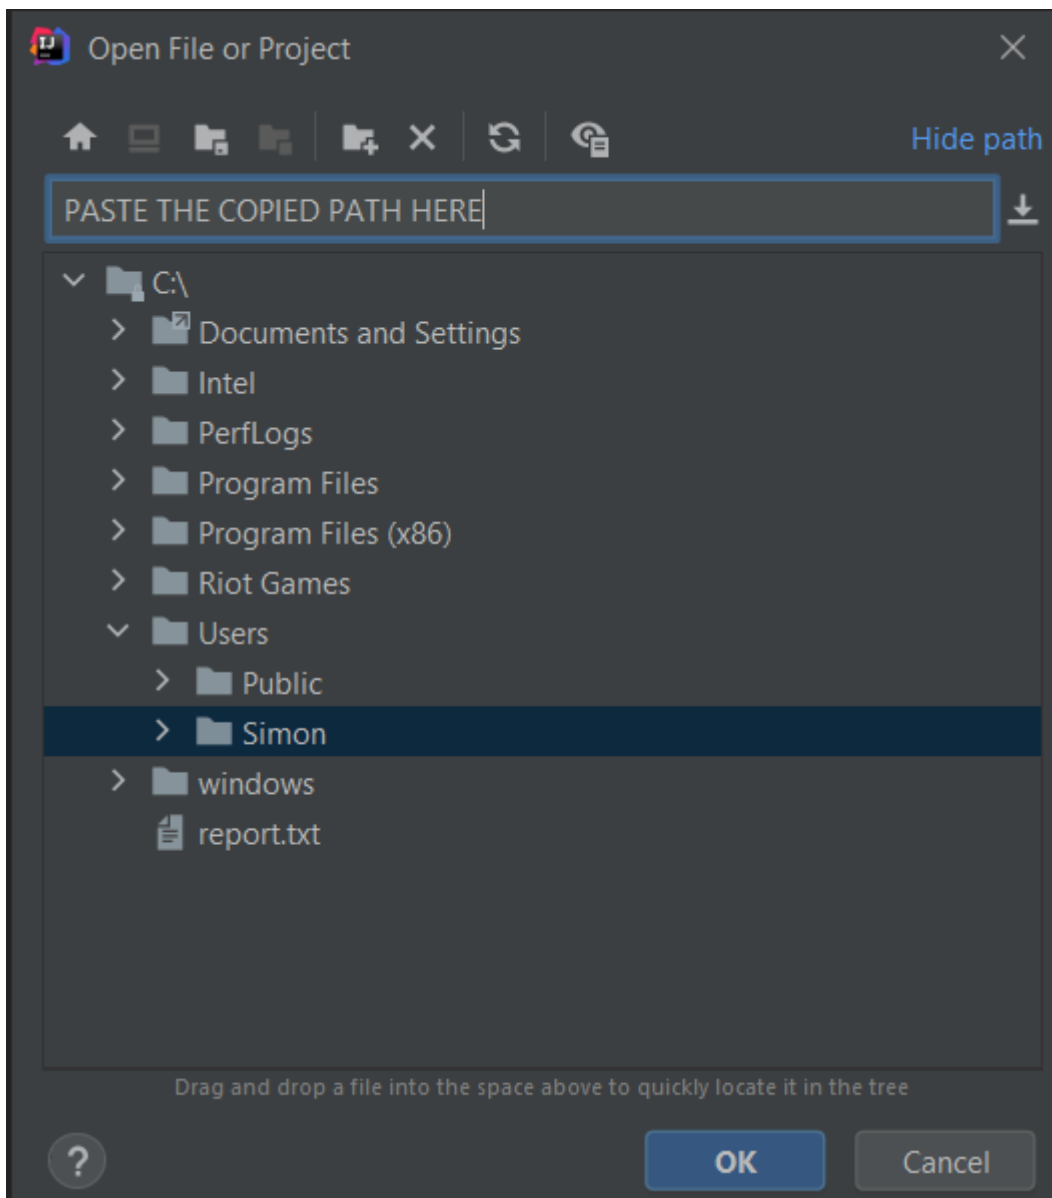

5. Open IntelliJ
6. Click open or Import (if welcome page not shown, skip this step)

7. Click file → open (If welcome page was shown, skip this step)

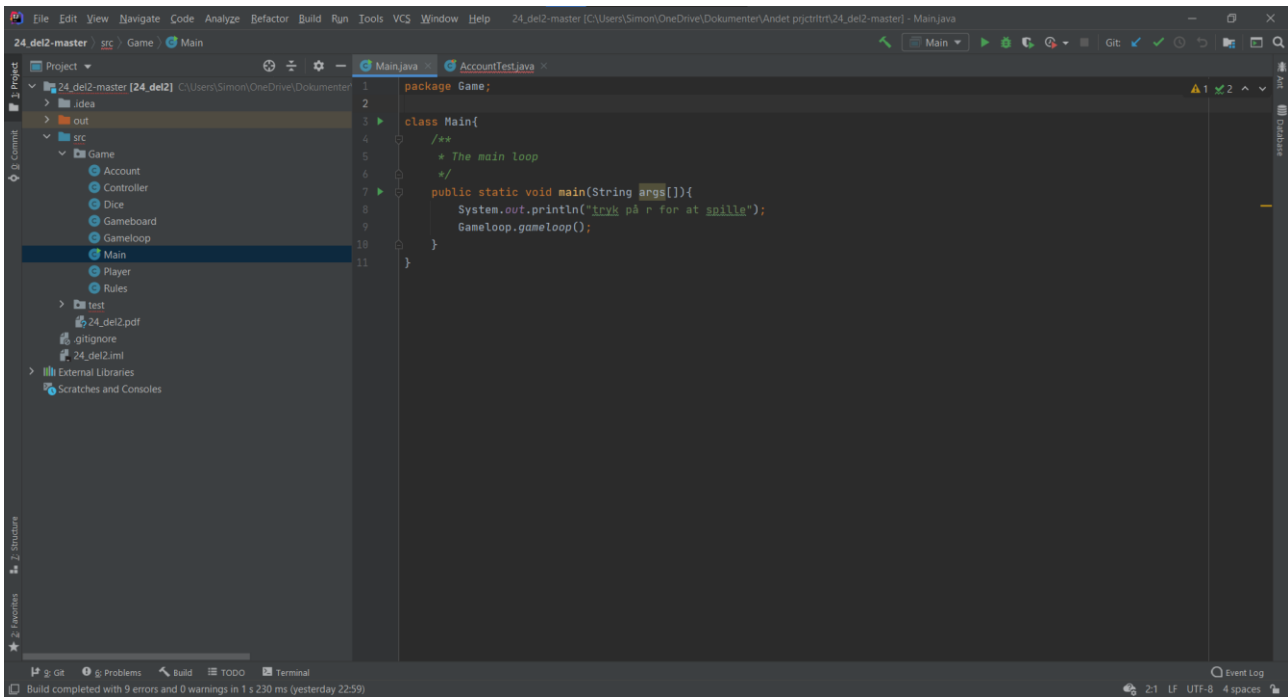

8. Paste the copied path and hit enter

Now the project should be shown and ready to run.

It should look like this:

9. To run the code press SHIFT + F10
